About Me	Computer Science Graduate Back-End & Android Developer Security-focused developer specialized in PHP (Laravel) and Java (Firebase). Expert in engineering complex, multi-role systems such as EduWave and AutoParts Jo. A lifelong learner dedicated to mastering new technologies and delivering high-impact results with speed and accuracy .
----------	---

Education	Bachelor of Science in Computer Science Jadara University 2021 -2025 Graduation : Semester I (2025/2026) GPA : very good
-----------	--

Skills	C++ Java Android (Java,SQLite) Flutter & Dart (in progress) Laravel (in progress)	HTML CSS JavaScript PHP MySQL
--------	---	---

Languages	Arabic (Native)	English (Proficient)
-----------	-----------------	----------------------

Projects	EduWave – Virtual School Management System : Comprehensive Development of a Full-Stack Web Platform Created an all-encompassing Full-Stack web platform designed to enhance school administration by connecting students, teachers, parents, and administrators. Implemented Role-Based Access Control (RBAC) for five distinct roles, providing secure and personalized dashboards tailored to each user type. - Integrated an automated PDF Certificate Generation system using TCPDF - Enabled real-time data visualization with ApexCharts for academic analytics - Ensured robust security measures by: - Utilizing PDO prepared statements to avert SQL injection - Applying bcrypt for password hashing - Implementing CSRF protection - Tech Stack:PHP , MySQL, JavaScript (AJAX/jQuery), Bootstrap 5. Graduation Project Management System : Developed a secure PHP-MySQL web application featuring a Bootstrap front-end, an AI keyword-matching algorithm, and role-based dashboards. This initiative significantly reduced manual supervisor assignment time by 80% through the use of prepared-statement security. AutoParts Jo : Created a multi-role Android marketplace using Java, Firebase Auth/Firestore/Storage, FCM notifications, and role-based access control. This platform facilitated real-time inventory management, image uploads, and seamless end-to-end order flows. TaskMaster : Developed a full-stack Android task management application employing Java, SQLite, and Firebase-style local notifications. This app streamlined task creation, tracking, and reminders .
